

Is a cancer clinical trial right for you or someone you love?

TALK TO YOUR DOCTOR.

A **clinical trial** is a type of research designed to learn more about new ways to prevent, detect, diagnose, or treat diseases.

Clinical trials in **cancer treatment** may help researchers find better treatments.

Before you decide to join a clinical trial, you should know as much about it as possible. Turn this card over for questions to **ask your doctor**.

Questions to ask your doctor about cancer clinical trials

Here are questions to get you started. Think about these and your own questions, write them down, and bring them with you to your doctor visit.

- Is there a clinical trial I can join?
- What clinical trials are offered for my cancer?
- What costs will my health insurance cover?
- Will I have to pay for anything?
- What is the goal of this clinical trial?
- What will happen in this clinical trial?
- Where does this clinical trial take place?
