

## Be A Part of the Solution for Dominantly Inherited Alzheimer's Disease!!!

Is there a mutation on one of 3 known genes that cause Alzheimer's disease (AD) in at least one member of your family?

- OR -

Has your family experienced 3 generations of AD in which symptoms started younger than age 60?

If so, please JOIN the DIAN Expanded Registry (EXR)!!

- Learn about opportunities to participate in research.\*  
Current studies include:
  - DIAN-TU clinical drug trials
  - The DIAN Observational study
  - Exploratory Genetic Counseling and Testing (GCT) Program
- Receive invitations to educational webinars and conferences
- Receive periodic research updates
